

Explore the impact of a production management system to your value stream.

A value assessment report based on a comprehensive analysis of your value stream within 20 days!

Review processes
and systems

Identify
opportunities

Quantify
benefits

Implementing PSI metals is more than just installing software. With our solutions we increase your competitiveness by optimizing your supply chain and production processes.

During numerous projects with steel and aluminium producers around the world we have gained an understanding on the impact and capabilities of production management solutions.

Create value. Together.

Designed for decision makers in:

- Planning and Scheduling
- Production
- Quality
- Sales
- Purchasing

Conducted by process experts from PSI Metals.

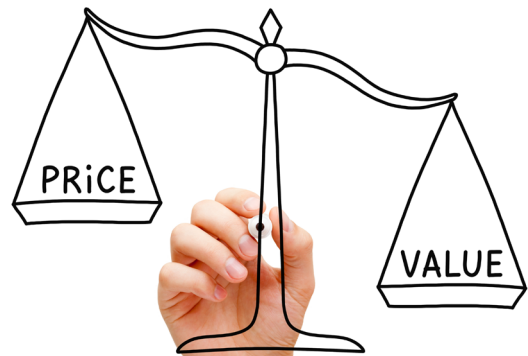

We will help you answer questions like:

- Where are my pain points today?
- What have others done to overcome them?
- Where are my areas for improvement?
- How will the process improvements be achieved?
- What are appropriate KPIs to measure current and future performance?
- What is the financial impact of the proposed improvements?

Schedule

- WS 1: "The art of the possible"
- WS 2: "Opportunities"
- WS 3: "ROI evaluation"

This is what you will get from the workshop:

- ✓ An explanation of the opportunity and potential of the business value (quantitative and qualitative)
- ✓ Discussion of how business processes, organisational or procedural change and/or technology will enable the business benefits to be obtained
- ✓ An indication of costs, resources and main deliverables
- ✓ A recommended approach to the sequence and timing of improvement projects including implementation issues

Check the detailed workshop agenda at:

Every day not gaining value is a lost day!
